

## For Dainty Body Purity

The highest mark of elegance in a lady's finished toilet is daintiness. This means more than merely being prettily and daintily gowned. It means more also than being simply clean.

It is the air of daintiness your very presence suggests to those around you. There is a "perfume of cleanliness," a bodily incense suggestive of health and purity of skin, that must be attained by any lady who wishes to bring to those with whom she comes in contact an impression of exquisite cleanliness and purity of body.

### Rexall Nice

is prepared to meet the demand of dainty women for a preparation that will not only help them overcome all odors of perspiration, but which is at the same time dainty and convenient to use and will give to those about them that air of perfect personal cleanliness so much to be desired by every fastidious person. It is the last touch in the finished toilet.

## How to Get the Most Value For Your Money

NO mechanical adjustments to make except the turning of one screw to bring the bowl to the correct height—once a year, perhaps; every bearing oiled with clean, fresh oil before the handle makes a quarter turn; no chance to injure the spindle or spindle bearings when replacing the bowl. These are three exclusive Primrose separator features.

Just think what those features mean to you. Nothing goes wrong on a Primrose, because there is nothing to go wrong. There are no adjustments to make for ordinary work. The milk supply bowl is firmly set in one place—the right place. The milk float goes into just the right position, either side up. Every bearing is plentifully oiled before you begin to skim. The gears are all rigidly fastened. The bowl has the cleanest, closest-skimming device and the largest skimming surface ever put into a cream separator.

The Primrose is worth more than any other separator built, and it sells for less than many of them. Drop in and let us show you why.
